

Evaluation of Support Services

The board believes that the support services provide a vital and necessary service to the effective and efficient functioning of the instructional program.

Support services will include accounting, food services, transportation, and maintenance.

In an effort to gain input and feedback related to the effectiveness of these programs, all personnel in support services, with the exception of supervisors, will be evaluated jointly by their supervisor and building administrator once each semester according to their job description. Supervisors will be evaluated by the superintendent annually.
