

## **Certificated Resignation**

Termination of a contract by a certificated school employee must be given in writing thirty (30) days prior to the final day of intended employment. The board recognizes that there are circumstances, which dictate an employee to request a release from a contract before the expiration date of the contract; therefore, certificated personnel may be released from their contracts by agreement of the board provided that suitable replacements can be secured.

Such agreement would be considered given when the resignation is accepted by the building principal, the superintendent or the school board.
