

Student Safety Policy

The safety and health of students, staff and patrons who attend to our schools and activities are of primary importance. It is the district's desire to provide safe and healthful conditions and operating practices that will ensure a safe school environment for all who come in contact with the district.

Accidents represent a needless waste of human resources and economic loss. A safe and healthful operation conserves human and material resources and is essential to efficient production.

All levels of management have a primary responsibility for the safety of all who attend to the assigned facility. The students, staff, and patrons, in turn, are expected to adhere to the regulations and policies outlined by the district.

These responsibilities can be met only by working continuously to promote safe practices among all who use our schools and to maintain property and equipment in a safe operating condition. By working together, we can maintain a safe operating environment for all.
