

Student Government

The school administration is directed to provide for the organization of student government in secondary schools which can take an active part in maintaining a positive learning environment. Student elections and student government decisions should be planned in ways that offer the student body opportunities to emulate the operations of local, state, and national government.

Student government should be given direct participation in the planning of student activities and the use of student resources. School administration should ensure that student government is provided with staff advisors to assist student leaders.
