Submittal Review:

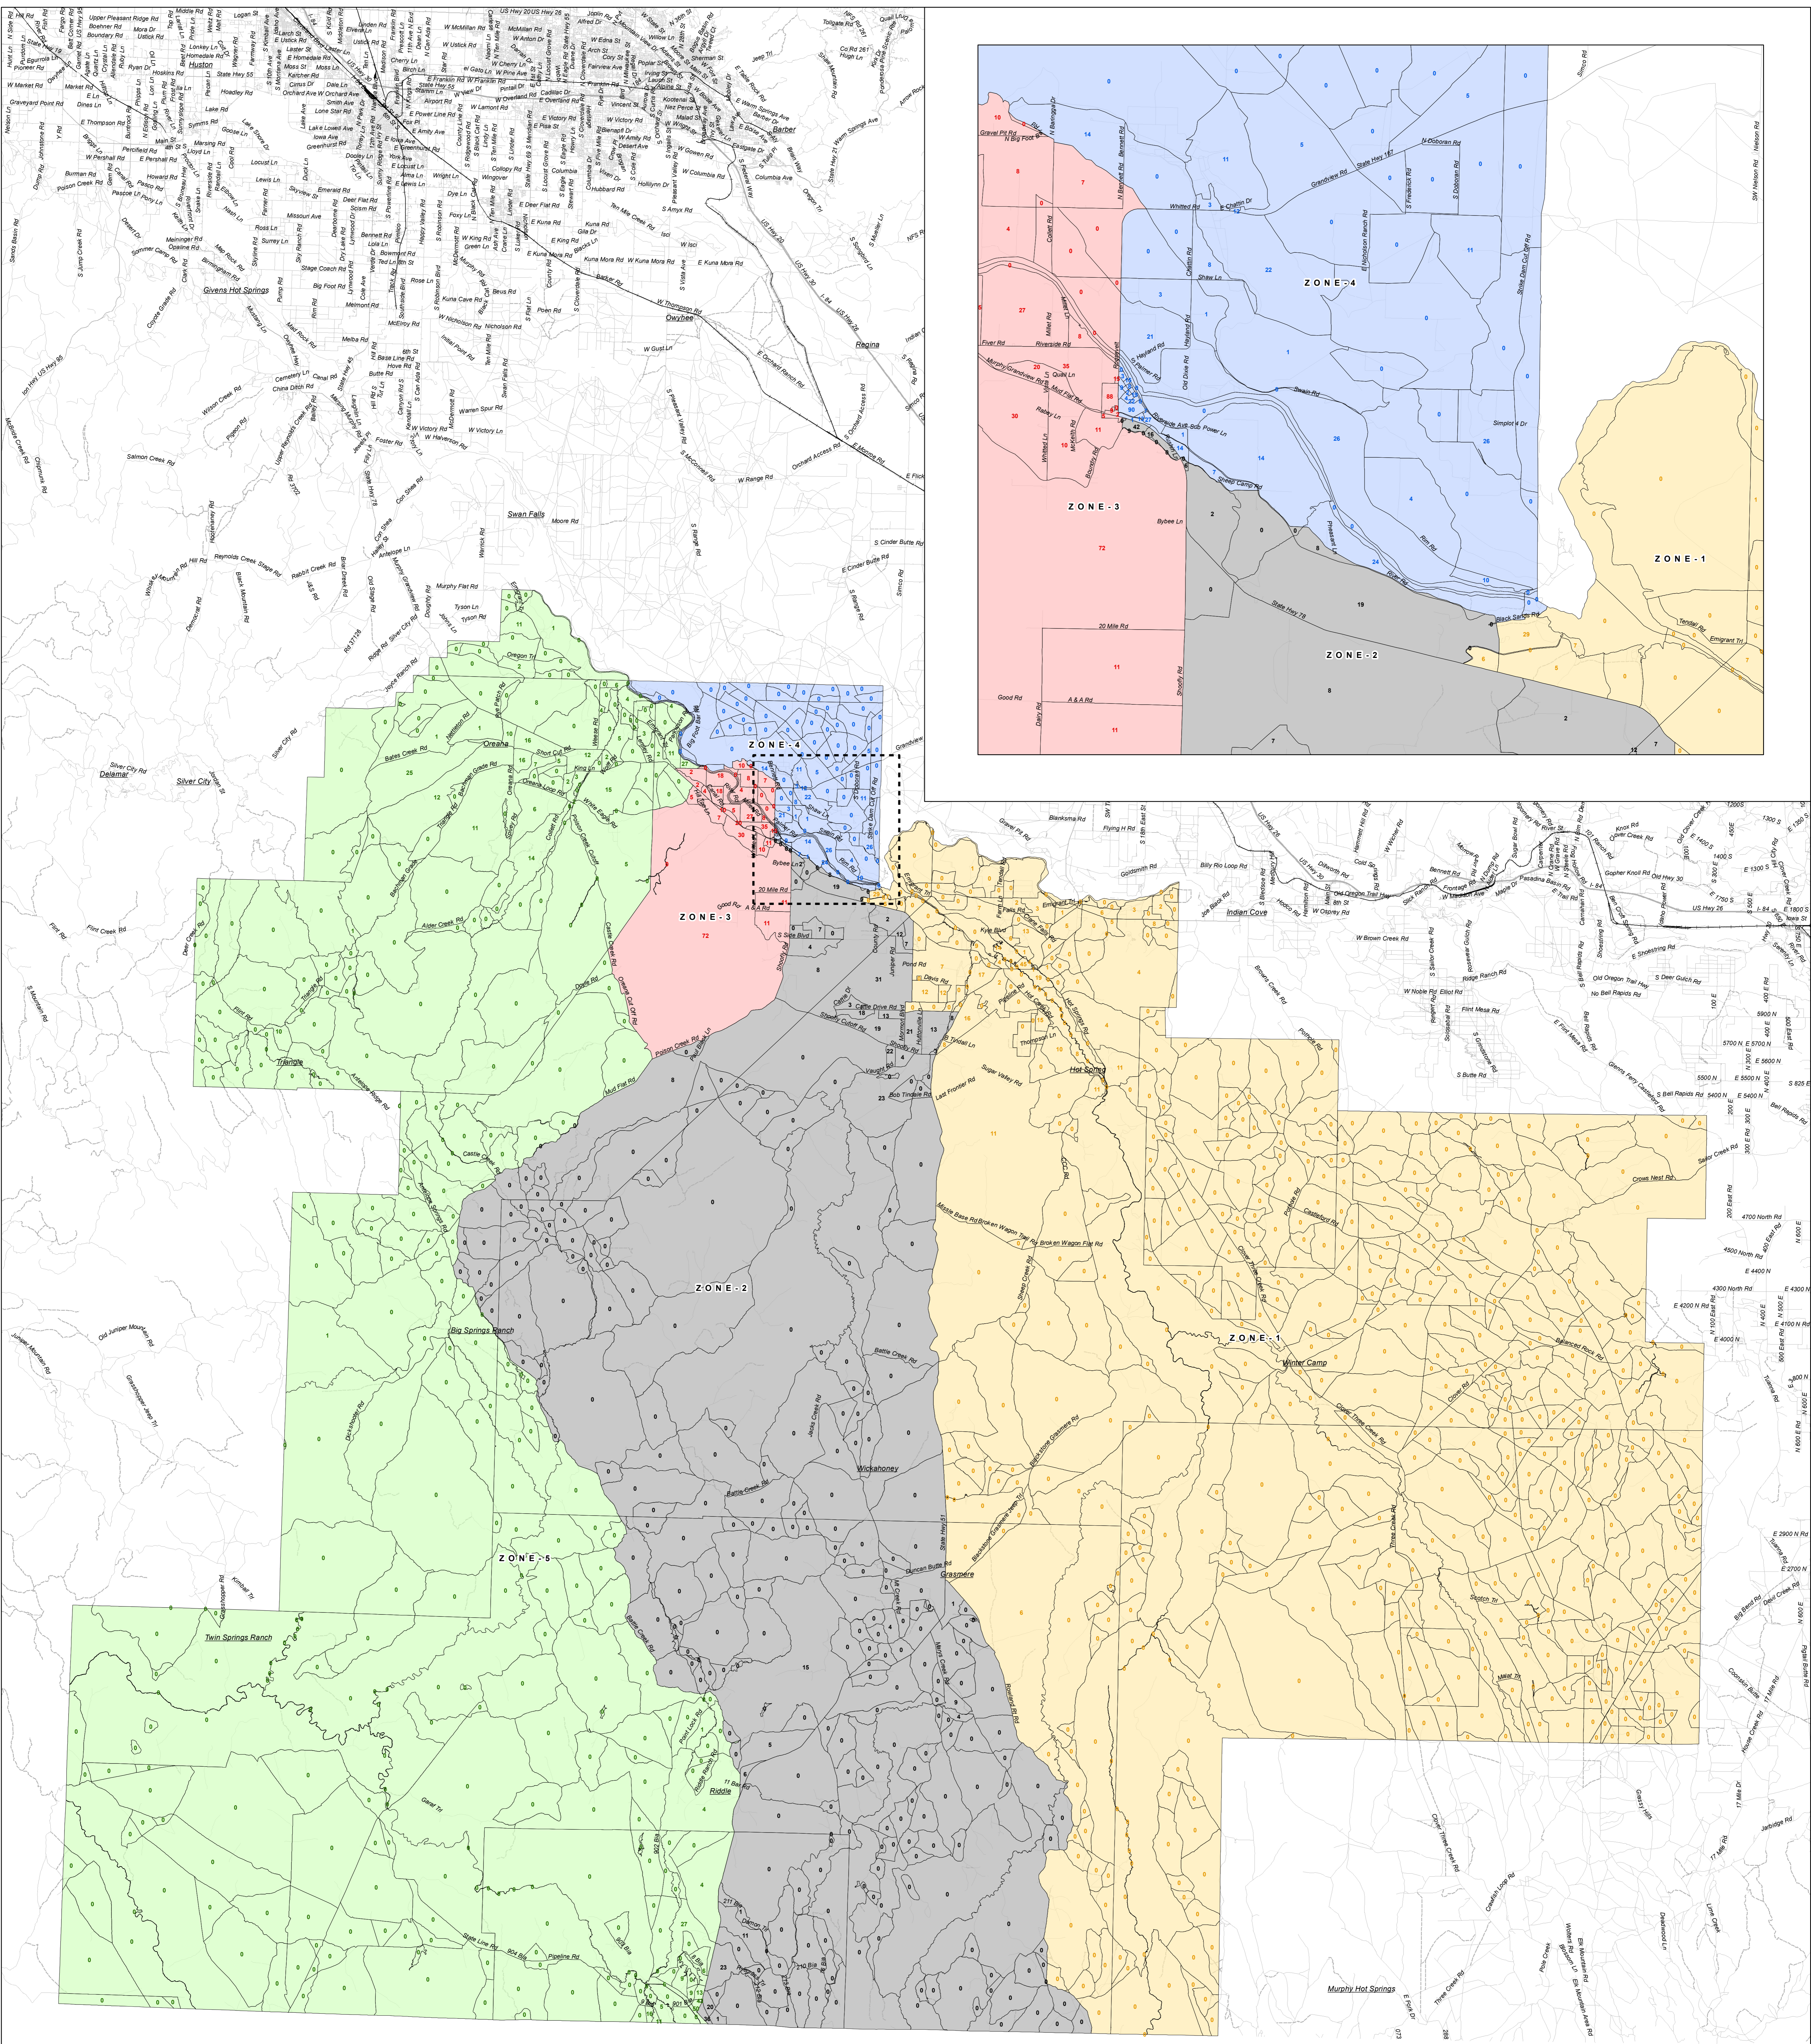

Yes – No

- Legal Description for each trustee zone
- Scalable Map showing each trustee zone
- Population summary for each trustee zone - meet 10% variance
- Shape files/xml files
- Acceptable zone shapes
- Legal descriptions meet professional standards
- No significant census block splits without acceptable explanation
- Utilize 2021 Census data
- State Board of Education District Boundary
- Other (See comments below)

Percentage variance from highest zone population summary:

Highest Zone Population		489
Zone	Population	%Difference
1	452	7.57%
2	464	5.11%
3	454	7.16%
4	477	2.45%
5	489	0.00%
2336

Highest Zone Population	Trustee Zones		489
Trustee Zone	Trustee Zone Population	%	Difference
1	452	7.6%	
2	464	5.1%	
3	454	7.2%	
4	477	2.5%	
5	489	0.0%	
Total	2,336		
Target Zone Population	467		

Population Compliance

The chart to the left depicts the 2020 Census populations of your existing Trustee Zones. If the "% Difference" value is over 10%, then the Trustee Zones are out of compliance for "equalized population."

Moving populations from highly populated zones to lesser populated zones will decrease the variance.

You can use the "Percent Difference Calculator" provided via email from QCI to recalculate your variance as populations are moved from one zone to another.

* Calculations are based upon requirements established by the Idaho State Board of Education

Census Block Information

If you see a bold outline around a census block, then that census block has population in it and is being split by a current trustee zone boundary. The trustee zone boundaries should be modified to include ALL of the census block.

The census block populations are color coded to identify which trustee zone they have been assigned to.
